

Isolation

[0.1,0.5]

CR1

CR2

[0,0.1]

FR

SR

m_T, MET

The diagram illustrates a 2D parameter space defined by 'Isolation' on the vertical axis and ' m_T, MET ' on the horizontal axis. A vertical line and a horizontal line intersect at the origin. The vertical axis has two labeled segments: '[0.1,0.5]' above the horizontal line and '[0,0.1]' below it. The horizontal axis has a label ' m_T, MET ' at the right end. Four rectangular regions are shown, all with thick black borders. The top-left region is blue and labeled 'CR1'. The top-right region is green and labeled 'CR2'. The bottom-left region is yellow and labeled 'FR'. The bottom-right region is red and labeled 'SR'. The green region 'CR2' is nested within the blue region 'CR1', and the red region 'SR' is nested within the yellow region 'FR'.
